## SIMS

SIMS is a free and powerful IT software solution offered by DigitalEdu for management of educational institutes. SIMS brings the power of Cloud, Internet, RFID, Biometrics & Mobile technologies to the education industry for enhancing the overall administration process.

## SCOPE OF WORK - Service Provider - DigitalEDU Pune

### Setup of Server for customer to provide and support for computing services

- Setup of Hardware server at the Network Service Provider Server Farm, with appropriate hardware devices installed like High Speed Ethernet, satisfactory amount of RAM memory, appropriate size of Hard Disk, configurable static IP Addresses etc. This hardware server will be used as dedicated server maintained by DigitalEDU for serving computing needs of the institute
- Installation of Operating System and ensuring robustness
- For long-term stability and robustness, an updated version of Linux based operating system will be installed and set up. DigitalEDU will completely manage and configure various services on the installed Linux platform. For strong security, the Linux system will be Firewall-ed against all inappropriate ports for various networking protocols like TCP-IP, UDP etc. The Linux based operating system will be updated from time-to-time to safeguard against any exploitable vulnerability exposed on the Internet
- The Linux based operating system will be setup to function with the static Internet Protocol Addresses provided by the Service Provider. Furthermore services like remote logins on Secure Shell would be configured, to be access on these IP addresses, for System Level Server maintenance and management
- Installation computing services platform - SIMS - Student Information Management System

### Installation of various Services on the Server

Various highly scalable and high load capable services will be installed on the server for providing different functional aspects of the Computing Services platform.

- Web Server - A HTTP enabled web server will be installed, configured and maintained by DigitalEDU for the institute. This server would be capable of providing various web related online services, like service static and dynamic web pages, images etc. The HTTP server will be configured to listen on the standard port 80, over the Internet accessible IP address, unless for certain reason, there is need for the service to be configured on some other port/s. The web server will be Linux based and configured such that it will be highly scalable, multiple instances of the web server process will be simultaneously executed for serving the Computing Services load.

Web server maybe also extended to provide Secure Socket Layer (SSL) based web services, on default port 443, if requested by the client or if there is any need of such capabilities in the Computing Services platform.

- Database Services - Linux based high load capable and scalable, Database Services will be installed configured and maintained by DigitalEDU to enable multiple applications for the Computing Services platform. The database server will be protected by strong firewall against open Internet access. Multiple databases as required by various applications will be installed and maintained. Multiple instances of the database service will configured to execute simultaneously to ensure spontaneous, instantaneous response abilities even during high volume database activity loads. Also various plug-in for database access by applications will also be installed and maintained.

### Support and System Maintenance

Service Provider will be fully responsible for system routine maintenance, data backup and other support required for well functioning of the server.

### Domain Registration and DNS Settings
