Sub: Approval for extension of programmes/courses under NSQF

Sir/Madam,

This is in reference to your proposal for extension of the programmes/courses being run by your institution under the NSQF. I am directed to convey approval for extension of the following courses/programmes:-

CC

- Medical Lab Technician

You may admit students in the approved courses in the academic session 2018-19. Grant-in-aid to the eligible institution will be limited to only operative / training cost per student basis in accordance with the Common Norms notified in Official Gazette of India for Skill Development Schemes by different Ministries and Departments as may be amended from time to time. You are requested to share with us the course-wise actual intake of students at the earliest so that UGC may consider releasing the admissible grant under the training/operative cost.

You are also requested to kindly ensure compliance of the terms and conditions/provisions as laid down in the Guidelines for providing Skill-based Education under National Skill Qualification Framework.

Thanking you,

D. Manoj Patil

Objective: To develop the skills for medical laboratory practices, management and services in healthcare sector.

Examination pattern: Annual

Eligibility: H.S.C. or 10+2 Pass or equivalent.

Duration: One Year (12 months)

Medium of Teaching: English.

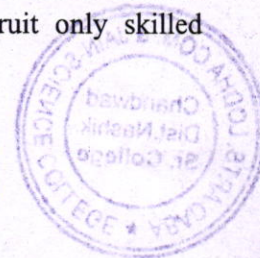

Marks: 600 (Theory-240 and Practical-360) and Internship

Scope: H.S.C. (or 10+2) is said to be one of the most important turning time or point in the educational period of students. Students are not well focused about their future or carrier. Hence they need a proper counseling and thus the course is designed as a one of the best alternative for their future as well as carrier. The course can be completed either as a full time or part time along with the graduation. The certificate obtained will be for obtaining jobs in a various fields of healthcare sector and even in other sectors as a lab technician. The student can be independently start his/her own Business or Laboratory or can associate with any kind of laboratory or associated jobs with acquired skill and full confidence.

The academic syllabi often do not give autonomy to the students and teachers and often fail to address the regional needs. The proposed courses will relate education to the professional and more competitive fields and domains. They would certainly make the students more employable and open up new avenues in job-market. By implementing the scheme of "Community College" and the Diploma in Medical Lab Technician, the college can significantly contribute to the socioeconomic development of the region.

This course will even help students to understand how modern techniques are used to solve the problems in healthcare and allied sectors. Such skilled personnel can also be useful for another sector like pharmacy, food, agro, cosmetics etc. Also such skilled people help to act & to ensure that their business operations & functions operate in a lawful, environmentally responsible and safe manner. The course will help them to educate both theoretical and practical aspects of concerned field. The ever-increasing demand for more detailed and accurate data from such skilled people will be in constant demand.

Skills and knowledge are the driving forces of economic growth and social development of a country. In rapidly growing economies like India with a vast and ever-increasing population, there is a severe shortage of highly-trained, quality skilled resources, while on the other; large sections of the population possess little or no job skills. Education should always be purposeful, growth oriented and productive. Along with Academic Qualifications we need to produce dynamic and enterprising youngsters capable of facing the changing times and taking on the toughest technical challenges. Prospective employers along with academic Qualifications are looking at the worth and expertise of a candidate from the view point of employability potential of the candidate. Furthermore, the industry has neither the time nor inclination to train a fresher in skills required. Owing to tough competition, industry is ready to recruit only skilled

candidates who can contribute immediately to the well being of the company. Hence the emphasis is on how best to integrate industry relevant skill set and regular college curriculum and expose students to real workplace culture. The need of the hour is a sustainable platform to hone the skills of students and provide the support each individual needs to grow. A well defined solution is the establishment of Skill Development Centers by the educational institutes. Skill Development Centre will be a renowned and dynamic Centre of skilling initiatives of consistent high standards thereby offering a wide range of academic programmes in priority sectors empowered through building up strong nexus with the industries and professionals of repute thereby creating opportunities for the students of gaining advanced knowledge, on job training and employment.

We will create technologically equipped thought and action leaders in a wide range of spheres by providing value - based and high quality education along with the most indispensable professional as well as life skills.

Paramount importance will be given to training students in employability skills that cater to industry and technological needs. But, Skill Development Center also realizes the basic truth that being technically good is not adequate and therefore rigorous training will be given in communication skills, sound values and professional ethics to enable the student to venture out in confidence and prove his caliber in the competitive workplace.

XIIth Five Year Plan Document of Planning Commission has laid a special emphasis on expansion of skill-based programmes in higher education. It recommends setting up of Community Colleges (CC) to serve multiple needs, including (i) career oriented education and skills to students interested in directly entering the workforce; (ii) contracted training and education programmes for local employers; (iii) high-touch remedial education for secondary school graduates not ready to enroll in traditional colleges, giving them a path to transfer to three or four year institutions; and (iv) general interest courses to the community for personal development and interest.

Objectives

- To make higher education relevant to learner and community
- To integrate relevant skills into the higher education system
- To provide skill based education system to currently pursuing higher education willing to enter the workforce
- To provide employable skills to senior secondary school pass outs not willing to join higher education system
- To provide opportunities for community based life-long learning by offering courses of general interest to the community for personal development and interest
- To provide opportunity to move to higher education in future; and
- To offer bridge courses to certificate holders of general/vocational education, so as to bring them at par with appropriate NSQF level

Paper II: HISTOPATHOLOGY & CLINICAL PATHOLOGY

Theory:-

- 1) Cell
- 2) Tissue
- 3) Fixation
- 4) Types of Fixatives
 - a) Bouins Fluid
 - b) 10% Formaline
 - c) Zenker's Fluid
- 5) Decalcification
- 6) Tissue Processing

Practical:-

- 1) Fixation
- 2) Tissue Processing
- 3) Embedding
- 4) Section cutting
- 5) Staining
 - a) H & E Staining
 - b) Pap Staining

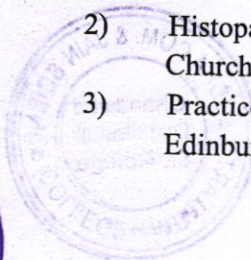

CLINICAL PATHOLOGY

Theory & Practical:-

- 1) Urine Examination
- 2) Stool Examination
- 3) Semen Examination
- 4) Semen Analysis
- 5) CSF Analysis
